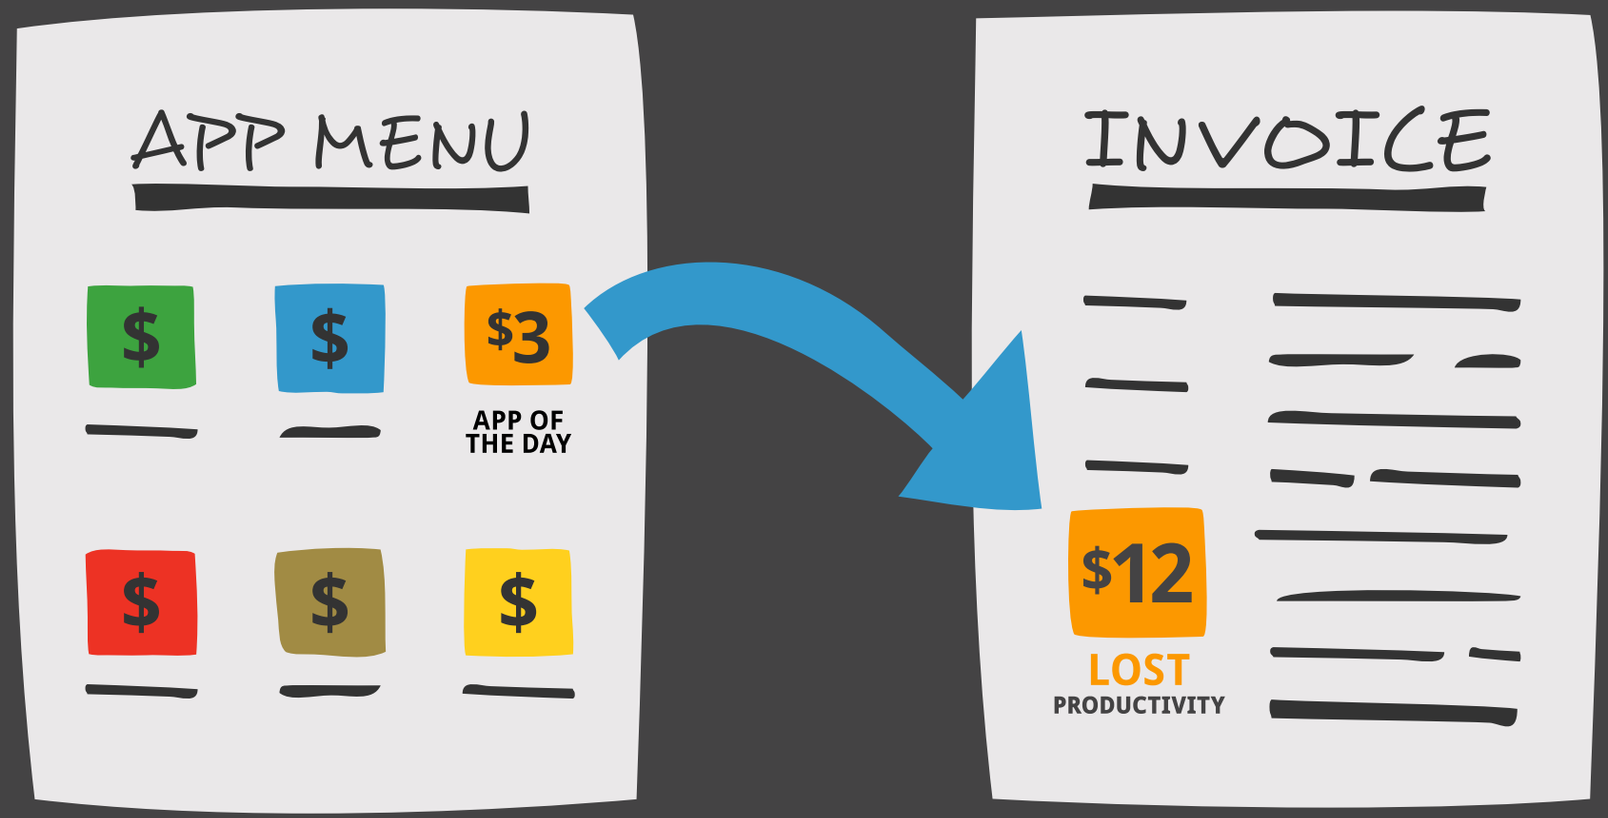
You Down With

VPP?

APPLE'S VOLUME PURCHASE PROGRAM JUST GOT EASIER WITH App47

VPP? IT'S JUST ENOUGH TO KEEP THE ENTERPRISE KINDA HAPPY.

iTunes was too much trouble.
Asking employees to purchase and download? A BIG time killer.



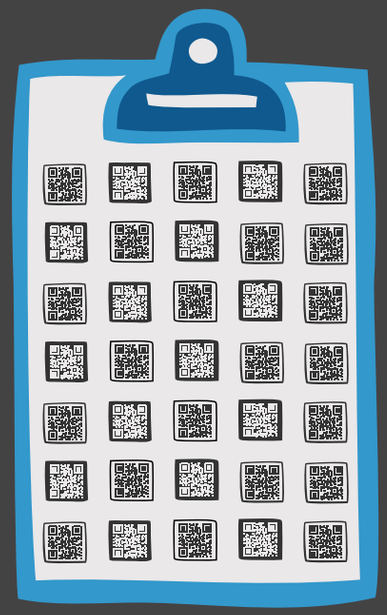
One three-buck app was costing
$12 in lost productivity.

App47

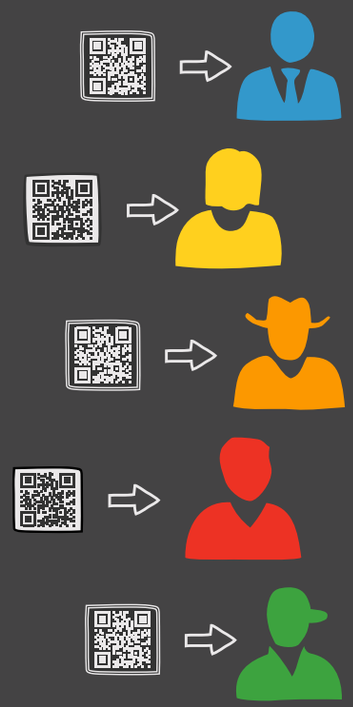
VPP MADE IT A BIT EASIER—A QUICK FIX, NOT A TRUE SOLUTION.

1. Buy apps for everyone

2. Get massive redemption code spreadsheet



3. Copy and paste one code per employee



4. Smash head with hammer

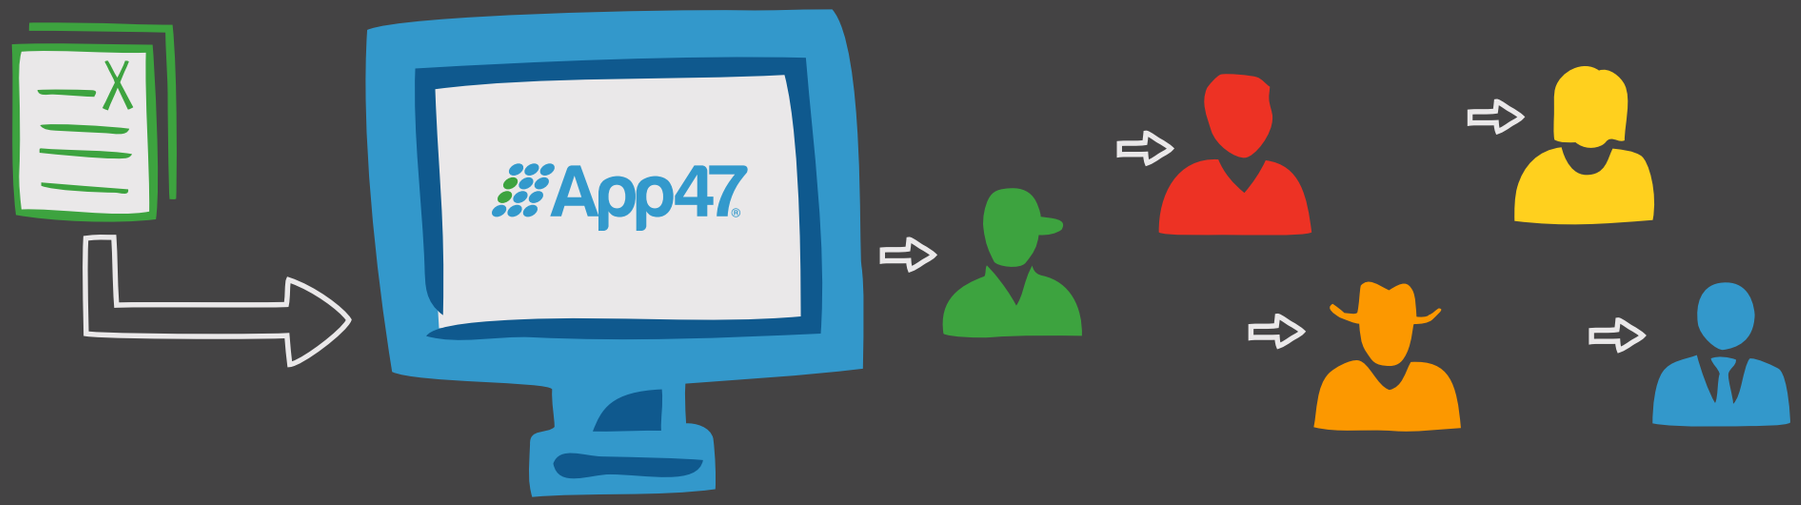
That's a bit better. Is there any tracking or visibility into whether the employee did their part? In a word NOPE.

App47

APP47, A SOLUTION GREATER THAN VPP.

App47 has created a simple way

to step in and help automate organization-wide app distribution and management.



1. Simply take that snazzy Excel file from Apple and drop it into our platform. Assign the codes to your employees, sit back, and let automation take over.

2. The employee will get the redemption code sent right to their device. The App47 dashboard automatically updates to show you which employees have completed the download.

App47

It's EASY.

You'll get the full benefits of end-to-end Mobile Application Management from App47, in addition to the ability to automate tracking and distribution of volume App purchases.

Set up your App47 account today and take control of your enterprise mobile apps.
